EDUCATION

B.Sc. Management Information Systems
University of Science & Technology, Sanaa
2007 – 2011

Ahmad Al-Naib

PROJECT LEAD · FULL-STACK SOFTWARE ENGINEER · AI SOFTWARE ENGINEER

Experienced Project Lead and Senior Full-Stack Software Engineer with over five years of experience building modern web, mobile, and AI applications. Specialized in software architecture, full-stack development, machine learning, and project leadership — with hands-on experience delivering scalable enterprise solutions using Laravel, React, Next.js, React Native, Node.js, and Python. Passionate about modern technologies and AI-driven solutions, from concept through production.

PROFESSIONAL EXPERIENCE

Project Lead & Full-Stack Software Engineer — Carnabuci GmbH

2025 – present

- Led multiple software projects from planning through successful delivery
- Coordinated the development team and provided technical leadership on architecture and design decisions
- Built scalable web applications with Laravel, React, Next.js, and Node.js; designed and implemented secure RESTful APIs
- Introduced and optimized Docker and CI/CD processes
- Conducted code reviews and mentored developers
- Worked closely with clients and stakeholders to translate business requirements into working software

Kleines Kraftwerk — React Native App & CRM System [kleineskraftwerk.de](#)

- Built a React Native application for iOS and Android
- Developed a CRM system for managing customers, orders, and service workflows
- Integrated RESTful APIs and optimized performance

React Native · React · Laravel · Node.js · PostgreSQL

Solar Energy Prediction AI Model

- Built an AI-powered machine learning model to forecast solar panel energy production
- Analyzed and processed energy and weather data; trained, evaluated, and tuned the prediction model
- Integrated the AI model into the existing software platform

Python · Scikit-learn · TensorFlow · Pandas · NumPy

Full-Stack Developer — GSD Software

2024 – 2025

- Built multiple web applications with Laravel, Node.js, Vue.js, and Next.js
- Planned modern software architectures
- Developed and documented REST APIs
- Integrated frontend and backend systems
- Used Docker for development and deployment; optimized build and deployment pipelines

Full-Stack Software Engineer — SITEC

2021 – 2024

- Built multiple enterprise applications with Laravel, Vue.js, Next.js, and Node.js
- Developed reusable UI components and integrated REST APIs
- Handled database modeling and migrations

LockPort — Bicycle Locker Booking Platform [lockport.online](#)

- Built the core features of a platform for online reservation of bike lockers and luggage lockers
- Designed and developed scalable frontend and backend components
- Built RESTful APIs and database models; optimized performance, maintainability, and usability

Laravel · Vue.js · Next.js · Node.js · PostgreSQL · Docker

Back-End Developer — Tricoma

2020 – 2021

- Built scalable backend systems and secure RESTful APIs with Laravel
- Handled database design, authentication, and role management
- Performance optimization

PERSONAL PROJECTS

RoteBete.ai — AI German Learning Platform [rotebete.ai](#)

- Built the Laravel backend and a React Native app
- Integrated AI agents for interactive German learning sessions
- Developed secure RESTful APIs and a modern system architecture

Laravel · React Native · AI Agents · PostgreSQL · Docker

CheapUI — AI-Powered UI Component Generator [github.com/ahmadalnaib/newAi-UI](#)

- Platform for automatically generating UI components using AI, with a chat-based workflow in natural language
- Generated production-ready components for Laravel, Vue.js, and Inertia.js; integrated Stripe for subscriptions

Laravel · Vue.js · Inertia.js · PHP · Stripe · OpenAI API · MySQL

Foota.ai — AI Football Prediction Platform [github.com/ahmadalnaib/football-v-3](#)

- AI-powered platform for predicting football match results with explainable reasoning
- Machine learning models analyzing historical match, team, and performance data; continuously improving accuracy

Python · Laravel · React · Machine Learning · OpenAI API · PostgreSQL
